

## **A Vision for Personal Aspiration**

*For every citizen in Bolsover District to have the aspiration to be the best possible version of themselves; stretch what they believe is possible and have access to the right knowledge & support to achieve their ambitions.*

### **Why?**

We have identified the strong link between personal aspiration and poverty and inequality in Bolsover District; and this is affected by things such as:

- Community & Family Influence
- Historical Events
- Perception of Opportunities
- Institutional Views
- Peer Support
- Education
- Acceptance of Fate

This has been developed from the notes of previous workshops and based on recurring themes and consensus within the group.

The workshop notes, mapping diagrams and other relevant material can be found here: [Bolsover Timeline \(padlet.com\)](https://www.padlet.com/)

### **Further Considerations**

How will we know we are making progress towards our vision?

What will organisations and services be doing differently?

Who will be affected by progress towards the vision?

Where will change be evident?

How will they be behaving differently?

These questions need to be answered **before** we can start to identify what 'we will do', 'we will be' type statements.
