GET READY FOR

A FRESH APPROACH

TO APPRENTICESHIPS

We are a government registered Flexi-job Apprenticeship Agency providing built environment apprenticeships in the Derbyshire.

Our trade and technical apprentices are employed by us while hosted by the companies we work with. We manage all employment responsibilities, including recruitment, assessments, salary, health & safety training, mentoring and pastoral support.

Our Flexi-Job Apprenticeship Service enables our apprentices to work for a variety of host companies with the reassurance of sustained employment throughout their apprenticeship, giving apprentices the best opportunities to start their chosen careers, while filling vacancies with new talent.

Our Apprenticeship Managers work closely alongside the apprentice, the host company and the learning provider to ensure each apprentice gets the right support to ensure they succeed.

Call us now, we're ready to find an apprenticeship solution that works for you.
