Under pressure and underfunded

- × Demand for services is going up
- × Issues people face are getting more complex
- × Yet, there is less money in the public sector
- × Essential services best provided at community level
- × Community led organisations lack income diversification
- × Commissioning favours larger organisations

Demand for services

Our vision

is of a just and compassionate society where people facing complex issues and barriers have the opportunity to thrive.

Our mission

is to partner with small and local charities, people and communities working towards a more just and compassionate society.

Gateway Into The Community, a charity we partner with in the North East
