

Tree planting with Bolsover District Council

Volunteers aged 18-25 are invited to join us throughout the Bolsover District to help plant young saplings and engage with nature. Volunteers are encouraged to bring gloves and spades, however some will be provided if needed. Tree planting season will run until the end of February to give the saplings the best chance at surviving through their first summer. By tree planting you are helping to create positive, lasting change to help restore our Earth. Each session will be around 2 hours in length. The location of each session will be confirmed.

Which Sustainable Development Goals does this volunteer project work towards?

- 11 – Sustainable cities and communities
- 13- Climate action
- 15- Life on land

How to volunteer:

Contact the Green Generation team to express your interest.
